

Motorized

Retractable

Acoustically transparent

New : our tensioned screen is now available with an acoustically transparent fabric !

With manufacturing quality on par with Lumene's screens, this acoustically transparent version of the Coliseum Premium screen uses a high-end woven canvas for impeccable sound and image results. Featuring the same specifications as its predecessor, this tensioned screen includes a high quality acoustic and elastic canvas. Its exclusive technology provides a perfect image, pronounced contrast, as well as excellent acoustic transparency. This canvas will allow you to place speakers behind the screen, just like in a true cinema. It guarantees linear frequency response with no compensation.

Note : a very slight phenomenon of luminous halo or moiré effect on the texts (especially subtitles) may be created if the screen is positioned too close to the wall. This is due to the reverberation of the light on the wall behind the screen.

4K compatible fabric.

Built-in remote control system

Tab tensioning system

Wall, ceiling or suspended mount

Safe clipping system

Home automation

SPECIFICATIONS

Screen material

High quality LUMENE screen material
PVC WMat-EL
Ultra white projection surface
Optimal acoustic behavior : almost nil diffraction, flat frequency response, no equalization needed
Gain 1.0
Directivity 150°
No shine point
Treatments : anti-yellowing, anti-mold
Black borders

Case

Black lacquered aluminium
safe clipping system
Easy and fast install
Wall and ceiling mounting
Hook for hanging installation from ceiling

Motor

Simple, reliable and quiet tubular Somfy motor

Control system

RS232 for home automation
Remote control with fine adjustment system (batteries provided)
Built-in IR remote control system
12V Trigger
Deported IR sensor provided
Manual switch (Up, Stop, Down)

Warranty

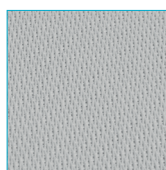

2 years

DETAILS

Installation

The acoustically transparent fabric is not totally opaque. We therefore suggest you to place it before a dark background. The speakers should ideally be installed so that the tweeter drivers are placed in the middle of the screen (or slightly above if there are several ranges of seats).

Woven fabric

Remote control

Deported IR

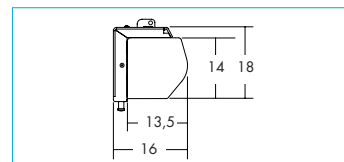

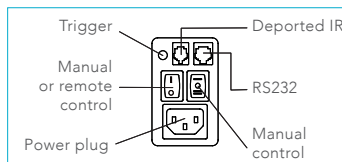

Trigger cable

Lateral tension

Technology

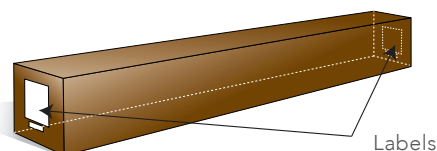

Acoustic is different from standard perforated or micro perforated PVC fabrics. Its specific structure allows a crossing of all the frequencies with no diffraction. As a result, the frequency response is linear, lossless in the high frequencies and the signal is much more precise than with usual screen materials.
